# SANA VOCE

## DYSPHONIA

All people and, in particular, professionals who use their voice on a regular basis (for example, teachers, singers and call centre operators) may encounter voice difficulties that may affect their work: these disorders are known as dysphonia.

Dysphonia comprises various types of vocal disorders, ranging from hoarseness to complete aphonia, characterised by one or more of the following symptoms:

- voice fatigue;
- impaired voice quality;
- sudden voice loss when using one's voice;
- difficulty in maintaining good voice intensity.

These symptoms may be attended by a feeling of dryness or pain in the throat, the need to clear one's voice and cough, and the need to rest one's voice.

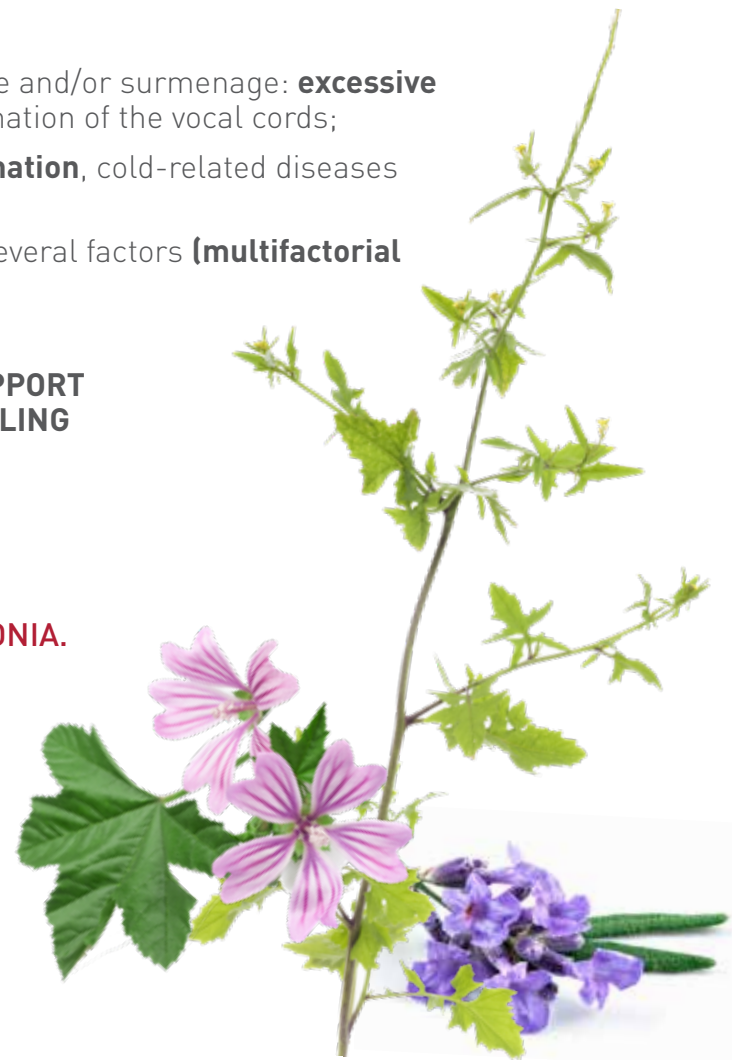

### THE CAUSES MAY BE:

- dysfunctional, caused by voice malmenage and/or surmenage: **excessive and incorrect voice use** may cause inflammation of the vocal cords;
- organic (larynx and extra-larynx): **inflammation**, cold-related diseases or allergic disorders.

More often, voice disorders are caused by several factors (**multifactorial etiopathogenesis**).

**PHYTOTHERAPY MAY BE A VALUABLE SUPPORT TO TRADITIONAL PHARMACOLOGY IN DEALING WITH DYSPHONIA.**

**FROM ERBA VITA RESEARCH COMES THE SANA VOCE LINE, WITH NATURAL INGREDIENTS THAT HELP RECOVER AND RESTORE VOICE TONE AND FIGHT DYSPHONIA.**
